

KLEVIO BUSINESS FEATURES

Access advanced key management features, Web Dashboard & premium customer support with the **Klevio Business Package**. Subscriptions vary depending on your setup, the number of devices you want installed & number of people that will use Klevio.

All features available under Klevio Connect

Your business & end users will get access to the consumer Klevio App to use for remote unlocking, and all the Klevio devices in use will be enabled with 3G/4G network connectivity. This means they will have the ability to automatically switch between different mobile data providers and your home or office Wi-Fi, ensuring 24/7 connectivity and service uptime.

Live chat & phone support

The Klevio Team is available to speak to our business users (clients and end users) via online chat support through both the Klevio website and app, or by phone at +(44) 20 3322 7981 during standard business hours (09:00 to 18:00) on any UK weekday except bank or public holidays.

Web dashboard login for central device, user and key management

The Klevio Dashboard makes multi-property management simple. It also lets you access several features that aren't available via the Klevio App, including bulk user uploads, labelling and Klevio App-less Access. It also lets you see at glance whether your Klevio device is online or offline.

Reshareable keys

Reshareable keys enable keys that have been shared by a master key holder to then be passed on to someone else. Once a key has been reshared in this way, it can no longer be passed on to anyone else.

Quick Access - unlock doors by scanning a QR code

Frictionless unlocking: users with access to your doors can simply scan a QR code instead of opening their app & searching for their keys. Quick Access codes can be set up quickly & easily from the Klevio Dashboard.

Keypad integration

Klevio can integrate with keypads, enabling you to create, change & revoke 6-digit pin codes for your users to unlock your doors. Great for users who don't have an internet connection to use the app!

API access for integration of Klevio with other services

Klevio can be integrated with your existing systems, such as your HR system, meeting room booking management platform, etc.

Active device monitoring & service disruption notifications

We monitor 15+ health alarms on your device. If anything goes wrong, we'll be in touch & provide support to prevent the device from ever dropping offline.

App-less Access

Klevio App-less Access lets you use Klevio for a limited time without having to download the Klevio App.

Detailed event log

Your personalised Web Dashboard can filter data by users, doors and dates.
